

ML Template Repo Project — Guide

EduHub · opencampus.sh · Project type: Presentation with link
(PRESENTATION_AND_LINK_WITHOUT_DOCUMENTATION)

You see this guide in the **My Project** panel once your team is confirmed and the project type is set. It describes **what you submit** — it is not a mandatory write-up from you.

What you submit

Main evidence: **presentation**, **link to your repository**, and **cover image**. Written documentation is **not mandatory** (optional upload allowed), since your code and notes already live in the template repository.

Deliverable	Required
Presentation (file)	Yes
External link (repository)	Yes
Cover image	Yes
Documentation (file)	No (optional)

In the template repository

Work in the provided [ML template repository](#):

- Follow the INSTRUCTIONS file in each folder.
- Put your slides in 4_Presentation (PowerPoint, Google Slides, or PDF).
- Update the main README with your project details.

Presentation

- Tells the **story** of the project and points to the repo for depth/demo.
- Include at least one **“Demo / link”** slide with the repo URL.
- About 8–20 slides recommended; formats: PDF, PPT/PPTX, ODP — max. 25 MB.
- Upload in EduHub under **Presentation**.

External link (repository)

- Publicly reachable (HTTPS), no undocumented login wall.
- Enter the link to your template repository in the **External link** field.

Cover image

- Visual entry point, e.g. taken from one of your slides; at least ~800×450 px.

- Upload in EduHub under **Cover image**.

Pre-submission checklist

- ☐ Presentation uploaded
- ☐ Repo link tested (incognito / different browser) and entered in the field
- ☐ Cover image uploaded
- ☐ Deadline met — **one** team member submits for the whole team
